

## **HARLEQUIN FLOORS' NEWEST PORTABLE FLOOR STRONGER AND MORE DURABLE FOR STAGE & TOUR**

**MOORESTOWN, NJ, July 26, 2016** – Harlequin Floors, the world leader in advanced technology flooring for dance, performing arts, entertainment and display, announced today Reversible Pro™, the newest addition to their line of portable ‘marley’ floors. Reversible Pro features a reinforced mineral fiber interply layer for improved tear strength and dimensional stability. This durable, multipurpose floor is designed for all types of dance and performance and is ideal for use by dance studios, touring companies and stage technicians.

"Harlequin is committed to developing products that meet the requirements of its customers. We recognized the need to supply a marley type floor that rolls out and lies flat right away – an absolute advantage for busy production crews and touring companies" said Bob Dagger, President of Harlequin Floors. "With Reversible Pro, crews can roll the floor out fast and move on to setting the stage – no need to wait for the floor to relax."

Harlequin Reversible Pro retains the same features as the top-selling Harlequin Reversible™ – it is lightweight, hardwearing and slip resistant on both sides. The unique double-sided option allows companies to flip the floor over and change colors around. The floor is currently available in two colors: Black/White and Black/Gray.

Harlequin is committed to continually delivering the highest quality products for dance and stage using new, advanced materials – supplying companies and venues around the world with the very best in marley floors, sprung floors and stage floor systems.

## **About Harlequin Floors**

Harlequin Floors, headquartered in London, England, is widely recognized as the world leader in advanced technology flooring for dance, performing arts, entertainment and display. Established in 1979, Harlequin Floors' experience and reputation are founded on the manufacture, supply and installation of a complete range of long-lasting portable, permanent, sprung and marley floors. The company's floors are preferred by dancers and performers at the world's leading companies and venues, which include The Royal Opera House London, The Paris Opera Ballet, The Bolshoi Ballet, American Ballet Theater, New York City Ballet and The Metropolitan Opera. WoodSpring™, Liberty™, Cascade™, Studio™, and Hi-Shine™ are a few of the contributions Harlequin has made to the industry. Harlequin's Contracts Division manages flooring and ballet barre installations and the construction of stage floors including, traps, ramps, dip-traps, cable ducts and apron carpentry. The Harlequin Group operates worldwide with offices in the Americas, Europe, Asia Pacific and Australia.
