

“To have a safe floor for our dancers... that’s everything.”

“After receiving a grant to upgrade our outdoor stage, we knew we wanted **Harlequin Cascade™**. The weather was colder than expected for our first performance on it, but it felt warm, and you could see the dancers didn’t hesitate to run or step into arabesque. To have a safe floor for dancers to not worry about shin splints or something of that nature, that’s everything. The dancers have to feel secure.

“Since Harlequin Cascade is manufactured with BioCote® antimicrobial protection we can rest assured that the floor helps to prevent bacteria and mold, further protecting our dancers. Because it is versatile enough to support any type of dance or performance, the outdoor stage will also be used by other local arts organizations throughout the year. We look forward to many more performances on our new stage.”
