ARB's outdoor stage features **Harlequin AeroDeck**® sprung floor panels and a **Harlequin Cascade**™ vinyl performance surface.

Founded as the Princeton Ballet Society in 1954, American Repertory Ballet is led by Artistic Director Ethan Stiefel. The organization comprises: the preeminent professional classical and contemporary ballet company in New Jersey; Princeton Ballet School, one of the largest and most respected non-profit dance schools in the nation; and ARB's Access & Enrichment initiatives, including the acclaimed DANCE POWER program, the longest continuously running community and arts partnership in New Jersey.

“My association with **Harlequin Floors** spans well over two decades, connected not only to my roles on stage as a performer, but also to my roles behind the scenes. In both cases, Harlequin has always provided an excellent product and one with personalized customer service.”
