

Harlequin Activity is a permanently installed sprung floor system, based on the well-established 'triple sandwich' construction originated by Harlequin over 40 years ago. It is a fully floating system with no fixings to the sub-floor and can be laid on any reasonably smooth and flat surface without prior preparation.

Harlequin Activity is shock-damped to avoid a 'trampoline' effect and provides area and point elasticity to offer identical characteristics across the whole floor. An 'industry-standard' choice, when correctly reinforced, that can withstand heavy loading including retractable seating.

Performance surface: Harlequin Activity can be installed with a Harlequin vinyl performance surface for all types of dance. A hardwood surface is available for specifiers who need a surface for multi-purpose use, including traffic by the general public, full stage entertainment, ballroom dance, or when required to match existing decor.

Installation: Harlequin Activity must be installed through Harlequin's contracts division and each custom installation is backed by a Harlequin guarantee.

Activity with Vinyl Surface

Activity with Hardwood Surface

Specification Guide

Installation	Permanent
