Harlequin Flexity is a cost-effective sprung floor panel system, designed for permanent or semi-permanent installation. Panels are laid in a brickwork fashion onto the sub-floor so that cross joints do not coincide. The panels are joined together by a special tongue and groove, which are glued together for permanent installation or fixed using woodscrews at predetermined points along the tongue and groove for a semi-permanent solution.

Performance surface: Harlequin Flexity is finished by choosing an appropriate Harlequin vinyl or engineered hardwood performance surface.

Installation: Harlequin Flexity can be installed by anyone with carpentry skills and full instructions are provided. It's a cost-effective choice, helping to reduce the injury risks associated with dancing or performing on a hard, unsprung floor.

Specification Guide

Installation	Permanent or Semi-permanent
Floor panel size	96" x 48"
Overall thickness	1½" nominal (without vinyl performance surface) 1⅝" nominal (with vinyl performance surface)
