Harlequin Hi-Shine™

Harlequin Hi-Shine is the ideal vinyl performance surface for television, concerts, display and exhibitions, as well as for use within theaters and for live events. It rolls out easily and provides a breathtaking glossy finish.

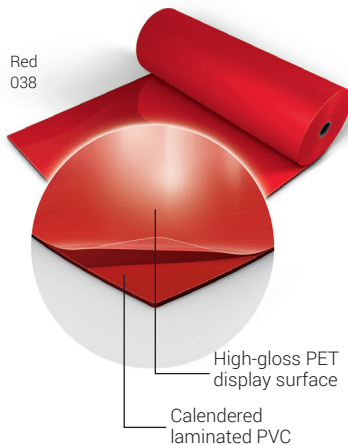

Utilization: Adding radiance to any occasion, Harlequin Hi-Shine is specified for loose-lay installation. Its special high-gloss surface is superior to urethane for scratch-resistance, providing a shiny, reflective surface.

Harlequin Double-Sided Tape is recommended to secure Harlequin Hi-Shine to a sub-floor. The low-tack/high-tack tape allows for easy removal without damaging the floor surface.

Specification Guide
